Let's do some sports

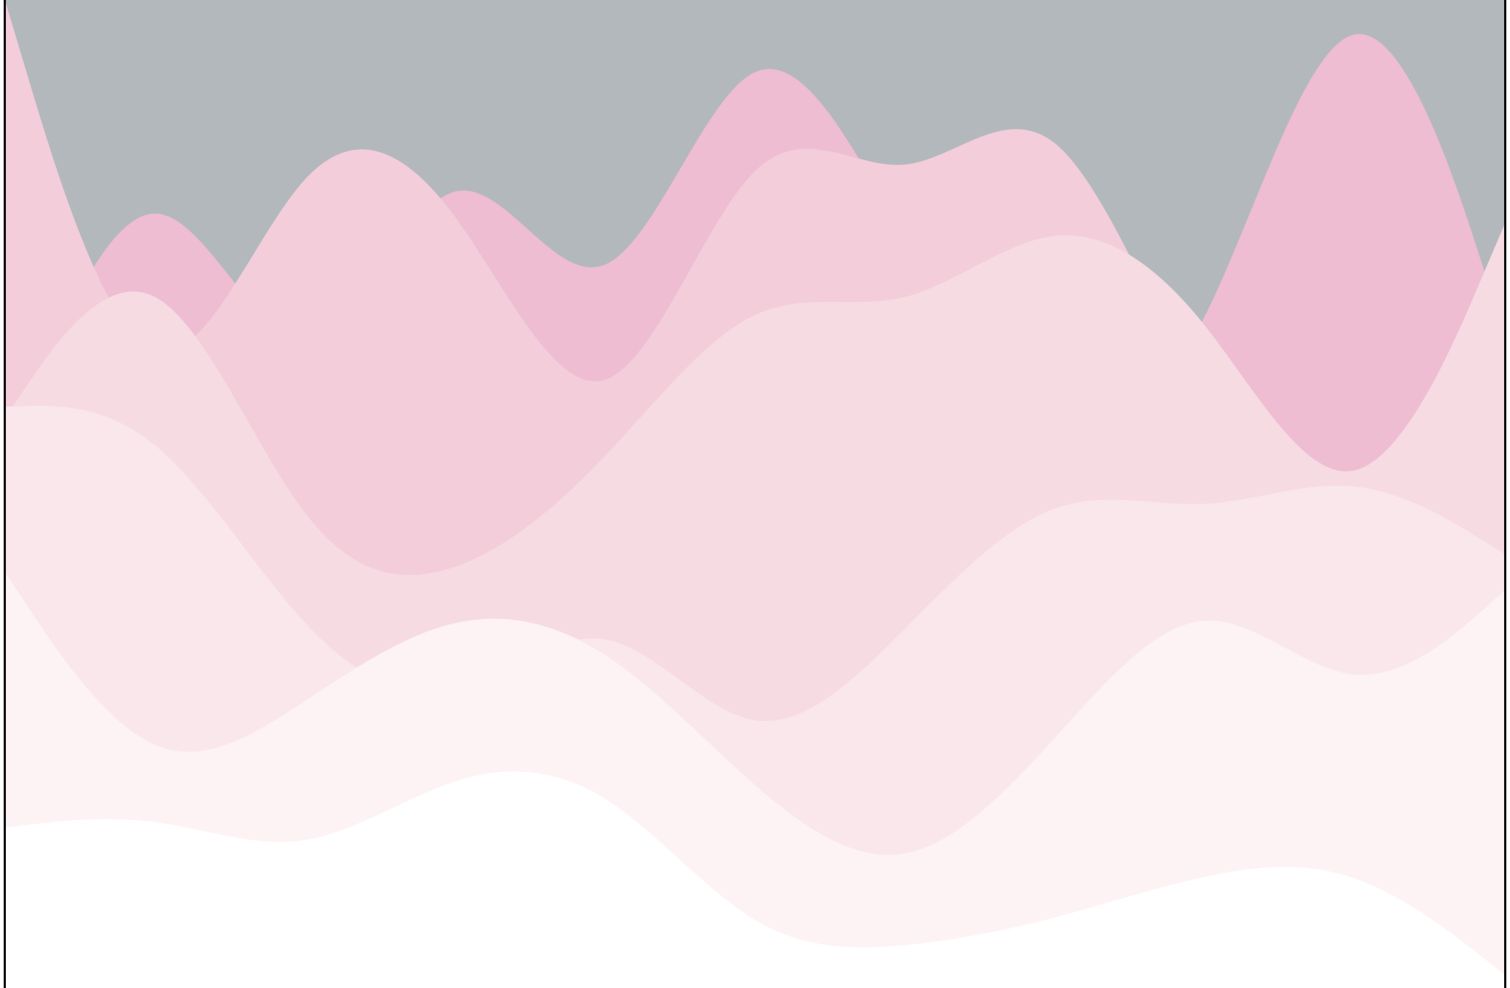

Piscine UX/UI — PR

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: A sports product, researched, then drawn.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

Contents

I Instructions **2**

II Foreword **3**

III Exercise 00: Project 2: Let's do some sports! **4**

IV Exercise 01: Project 2: Let's do some sports! **8**

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The picture in the foreword is not a hint. The pale steps behind the text are the page ground.

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

A sports poster has one job: you should know the event from across the street. The Olympics pictogram tradition (Aicher, Wyman) is the cultural neighbor, not the deliverable. Read the brief, meet the people, then present as if the client were in the room.

Picture: JeuneCrack

Recommended watching. The videos are context. They are not the deliverable.

Chapter III

Exercise 00: Project 2: Let's do some sports!

	Exercise 00
Project 2: Let's do some sports!	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Creation of a sports app with data tracking on mobile and e-watch (data visualization)

Yara is a runner. She runs 5 times a week and she's passionate! She'd like to challenge her own performance to make sure she is making progress.

Yara uses an Apple Watch and her iPhone.

'I wish I could have consistent data about my trainings, more than what already exists. I can run with my watch and I'd like to analyse and share my results with my sport coach."

She asks you to design an app on a watch and on mobile that could solve her problem.

You have to meet her after one week to give a first presentation of your work, after completing a tested mid-fidelity prototype.

The final presentation of your work will take place one week after the mid presentation, where you'll show a tested high-fidelity prototype.

Estimated time: 2 weeks

Team size: 2

Guidelines:

- You may consider building your UX and UI strategy before jumping in. Remember to question the initial brief with user research.
- Beware all the steps of the design process: Empathy, Define, Problem Statement, Ideation, Prototype, Test.
- You must interview or ask real people during the Empathy / User Research and Test phases.

- Upload the documents on Github, in a zip folder named "ProjectTitle_ Name_FirstName", with all project deliverables as follows: "Name_FirstName_ DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!
- In both phases, you must test your prototypes with at least 5 people.
- Make a presentation as if you were showing your work to Yara. Make sure there are at least 5 people in the audience.
- Prepare a feedback form to send the audience. The form must include at least the questions listed below.
- In both presentations, you are presenting to Barbara and her team.
- Timing: 10 minutes for the presentation and 5 minutes for Q&A.
- You may use the presentation audits to structure your presentations.
- Have fun!

Tools:

- Google Forms https://docs.google.com/forms/u/0/
- Airtable https://www.airtable.com/
- Typeform https://www.typeform.com/

Tips:

- Effective presentation skills https://academic.oup.com/femsle/article/364/24/fnx235/4587905

Intermediate deliverables:
Quote:
"Your mission in any presentation is to inform, educate, and inspire." Robert Ballard

Phase 1: Mid-project presentation audit
Make sure:

- At least 5 people are attending the presentation
- The presentation is about the whole UX process, including:

  - The intial brief
  - A project planning, including the UX phases, the tools chosen, the timeline
  - User research findings from qualitative and quantitative research (persona, figures, etc.)
  - A problem statement to adapt the initial brief based on the research findings
  - An introduction of the concept that came out of the ideation
  - The animated mid-fidelity prototype (a demo-video)
  - The main feedback from usability testing
  - The next steps of the project
- The presentation does not exceed 10 minutes
- Feedback forms have been shared at the beginning of the presentation
- You had fun!

Phase 2: Final presentation audit
Make sure:

- At least 5 people are attending the presentation
- The presentation is about the UI process, including:
  - A quick reminder of the previous presentation
  - A project planning, including the UI phases, the tools chosen, the timeline
  - A moodboard
  - A styleguide (colors, branding, typography, some elements of the library)
  - The animated high-fidelity prototype (a demo-video)
  - The main feedback from usability and desirability testing
  - The next steps of the project
- The presentation does not exceed 10 minutes
- Feedback forms have been shared at the beginning of the presentation
- You had fun!

Questions to ask in the feedback forms

- What do you remember of this presentation?
- On a scale from 0 to 10, how clear was the speech?

- Why?
- On a scale from 0 to 10, how engaging was the presentation?
- Why?
- On a scale from 0 to 10, how coherent was the presentation?
- Why?
- On a scale from 0 to 10, how impactful were the visuals?
- Why?
- On a scale from 0 to 10, how clear was the problem?
- Why ?
- On a scale from 0 to 10, how well does the prototype answers the problem?
- Why?
- What recommendation would you like to make to improve this presentation?
- Why?

Chapter IV

Exercise 01: Project 2: Let's do some sports!
