Atomic design

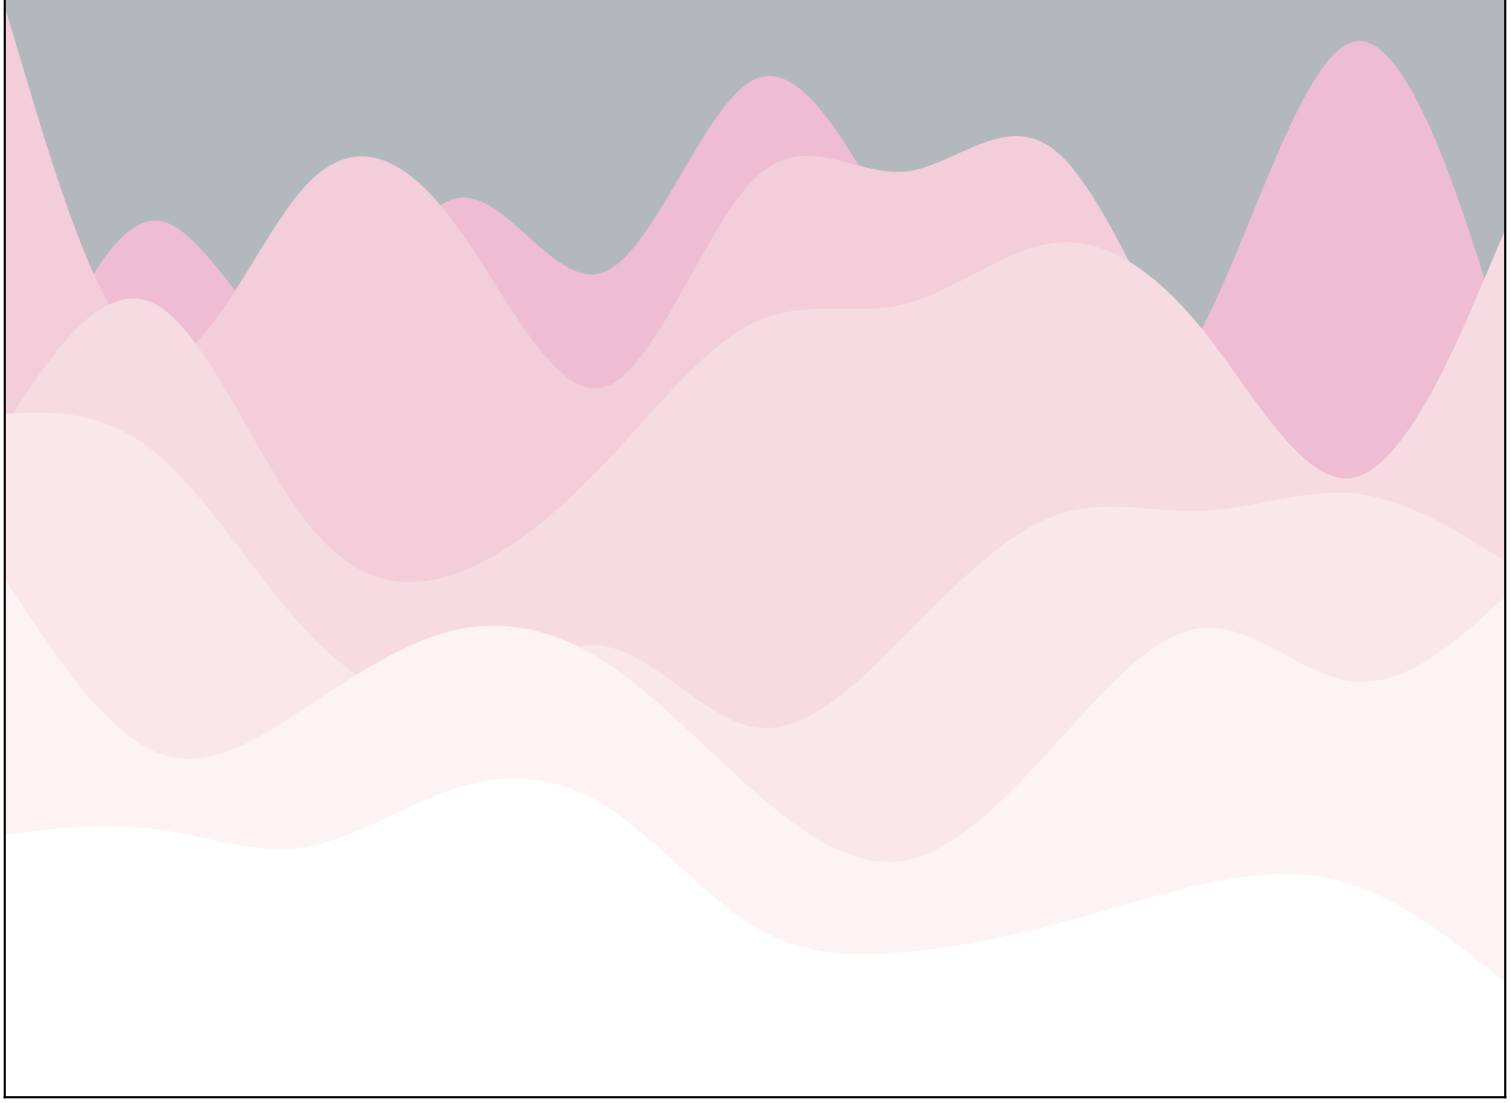

Piscine UX/UI — UI

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: From a browse of systems to two libraries with a job.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

Contents

I Instructions 2
II Foreword 3
III Exercise 00: UI II - Ex 1 - Browsing 4
IV Exercise 01: UI II - Ex 2 - Material Design 6
V Exercise 02: UI II - Ex 3 - Design system library 8
VI Exercise 03: UI II - Ex 4 - Library for climbing addicts 10
VII Exercise 04: UI II - Ex 5 - Library for a dating app 12

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The picture in the foreword is not a hint. The pale steps behind the text are the page ground.

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

Brad Frost named the ladder atom, molecule, organism, template, page, and put the essay online (https://atomicdesign.bradfrost.com/). It is a vocabulary, the way a manual page is a vocabulary. Naming a button an atom does not design the library.

Picture: JeuneCrack

Recommended watching. The videos are context. They are not the deliverable.

Chapter III

Exercise 00: UI II - Ex 1 - Browsing

	Exercise 00
UI II - Ex 1 - Browsing	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Context:

Welcome to the 2nd quest of UI!

This series of exercises is a great occasion for you to discover how libraries are made in UI, thanks to Atomic Design.

Instructions:

Among these 4 websites, make snapshots of these elements:

- 1 template
- 1 organism
- 1 molecule
- 1 atom

Websites:

- Alibaba
- Booking.com
- Easyjet App
- Interrail

Deliverables:

- A Figma file of 4 pages
- On each page, a screenshot of a template, an organism, a molecule and an atom
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_ DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_ John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

- Gareth graphic studio https://www.youtube.com/c/GarethDavidStudio
- Example here https://www.figma.com/file/fzqDkk8Zc8qJCiSMbKV0Ei/UI-II---Ex-1?node-id=0%3A1

Quote:

- User Interface Design is a hybrid role and can bring together concepts from interaction design, visual design, information architecture and even Front End Development

Chapter IV

Exercise 01: UI II - Ex 2 - Material Design

	Exercise 01
UI II - Ex 2 - Material Design	
Turn-in directory : `ex01/`	
Files to turn in : `ex01/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Download this image https://storage.googleapis.com/gd-wagtail-prod-assets/original_images/MDA2018_inline_02.jpg which is a snapshot of 3 screens of Lyft, and detect the order in which the layers were set.

Deliverables:

- A Figma file with the image
- On each screen, indicate the layers order with numbers. 1 being the background image, 2 the element right on top, etc.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- 2 numbers can be switched as long as the layering of layers is respected

Chapter V

Exercise 02: UI II - Ex 3 - Design system library

	Exercise 02
UI II - Ex 3 - Design system library	
Turn-in directory : `ex02/`	
Files to turn in : `ex02/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Copy 10 elements from easyJet design system, including

- atoms
- molecules
- organisms

Deliverable:

- A Figma file including 10 elements from easyJet design system
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- You can use Avenir Book instead of easyJet's font
- Explore Noun Project to get icons

Resources:

Chapter VI

Exercise 03: UI II - Ex 4 - Library for climbing addicts

	Exercise 03
UI II - Ex 4 - Library for climbing addicts	
Turn-in directory : `ex03/`	
Files to turn in : `ex03/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

You are part of a climbing group and volunteer to rebrand the website of your club.

Based on a moodboard, create a design system with at least 20 elements, including atoms, molecules and organisms, and include multistates.

Deliverables:

- A Figma file with a moodboard for a climbing group. Include:
  - Pictures
  - Colors (2 to 3 main colors)
  - Typography
- A Figma file with a library including:
  - At least graphic design 20 elements
  - At least one atom
  - At least one molecule
  - At least one organism
  - At least 5 multistate elements

- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Let's be creative! Get inspiration from visuals before diving in.
- Feel free to get inspiration from existing design systems. Browse Dribble and the Figma community!

Chapter VII

Exercise 04: UI II - Ex 5 - Library for a dating app

	Exercise 04
UI II - Ex 5 - Library for a dating app	
Turn-in directory : `ex04/`	
Files to turn in : `ex04/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

You are asked to design a dating app.

Based on a moodboard you have composed, create a design system with at least 20 elements, including atoms, molecules and organisms, and include multistates.

Deliverables:

- A Figma file with a moodboard for a dating app. Include:
  - Pictures
  - Colors (2 to 3 main colors)
  - Typography
- A Figma file with a library including
  - At least graphic design 20 elements
  - At least one atom
  - At least one molecule
  - At least one organism
  - At least 5 multistate elements

- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Let's be creative! Get inspiration from visuals before diving in.
