Rules

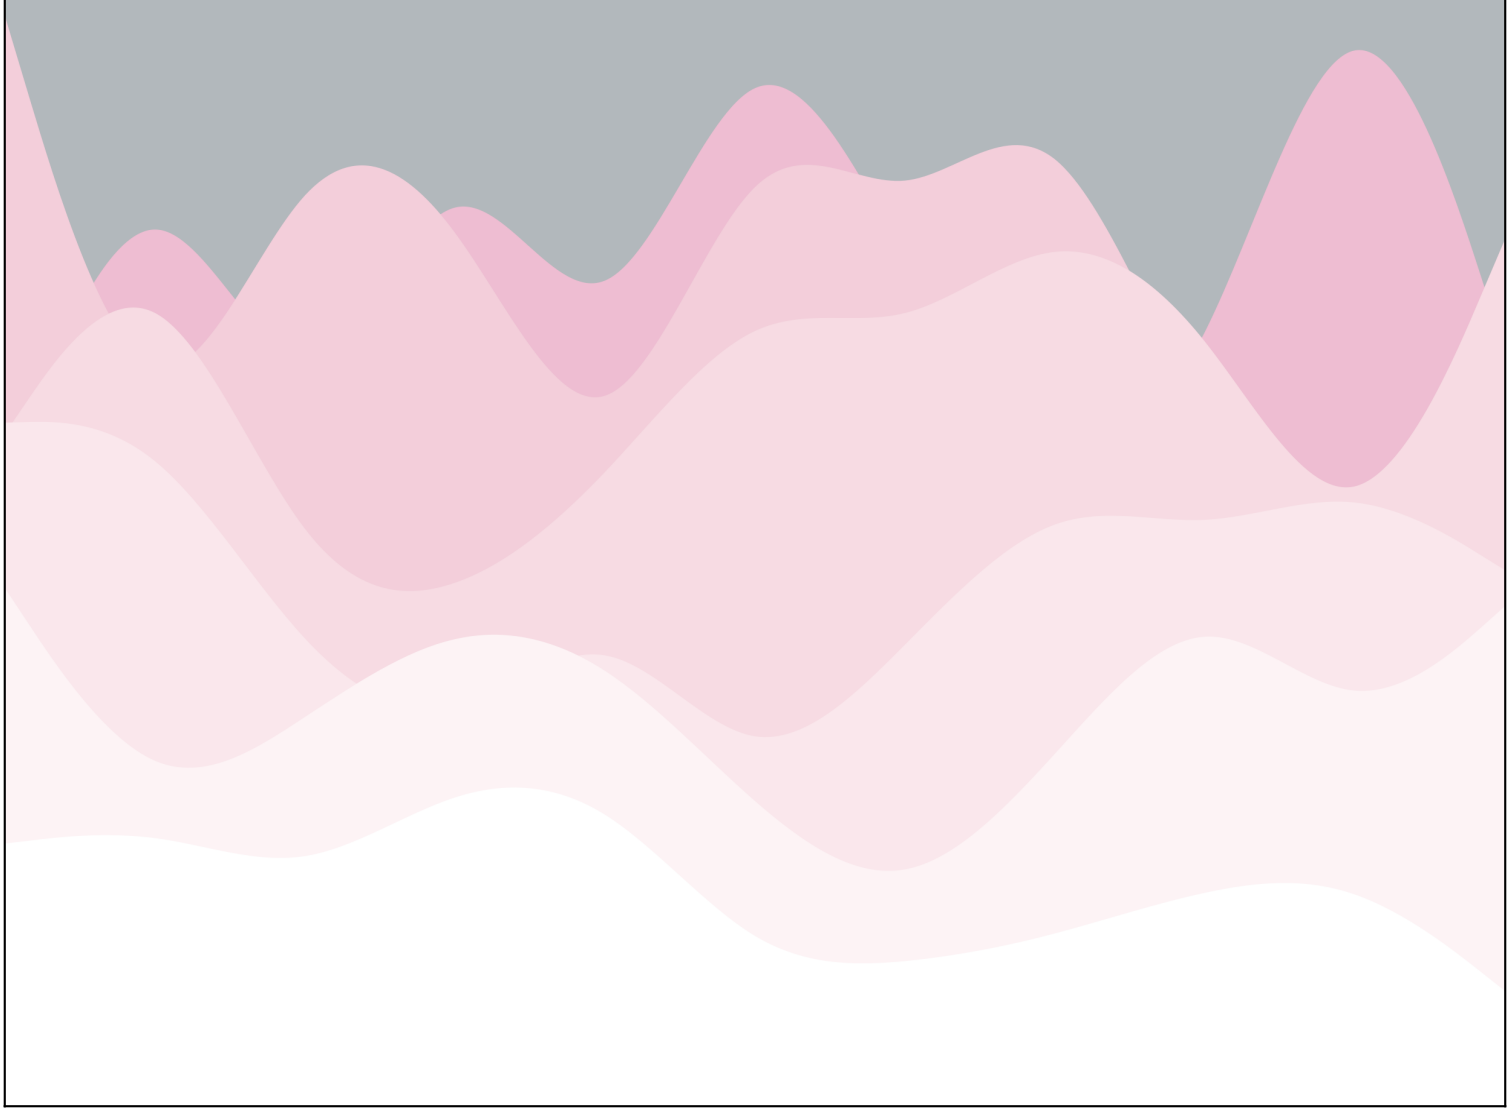

Piscine UX/UI — UI

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: Grids, states, accessibility, and the small controls people reuse.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

XII Exercise 09: UI III - Ex 10 - Micro-interactions 17
XIII Exercise 10: UI III - Ex 11 - Consistency 19

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The picture in the foreword is not a hint. The pale steps behind the text are the page ground.

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

Josef Müller-Brockmann wrote *Grid Systems in Graphic Design* so that alignment would be a decision and not a habit. Massimo Vignelli's *The Vignelli Canon* is the short version of the same stubbornness. You will draw lines on other people's screens. The books do not draw them.

Picture: JeuneCrack

Recommended watching. The videos are context. They are not the deliverable.

Chapter III

Exercise 00: UI III - Ex 1 - Grids

	Exercise 00
UI III - Ex 1 - Grids	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Context:

Welcome to the 3rd quest of UI.

In this series of exercises, you'll be asked to open your eyes and collect graphic elements from various websites. You'll see grids across screens, multi state buttons, how to make a design accessible for all, breadcrumbs, toggle buttons, radio buttons, calendar, time picker with 2 main goals:

- Enrich your graphic general knowledge
- Detect consistency, that helps users understand a digital product at the first glance.

Instructions:

Open these 5 images on Figma and draw lines and grids every time you find aligned elements.

Deliverables:

- A Figma file including the screens with lines on top to show grids. One page per screen or frame.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.

- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- 1st screen example https://www.figma.com/file/KOzd8yZuJvGLmZLuXjBgDg/UI-III-Ex-1.1

Chapter IV

Exercise 01: UI III - Ex 2 - Multi state

	Exercise 01
UI III - Ex 2 - Multi state	
Turn-in directory : `ex01/`	
Files to turn in : `ex01/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Go to Sony.com http://sony.com and observe the buttons and call to actions. When you hover or click on them, they change!

Make screenshots of the different states of buttons, menu titles, filters etc. Then, gather and organize them.

Find at least five combinations of multi state elements.

Deliverables:

- A Figma file with 5 combinations of multi state elements.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Video tutorial on Figma https://www.youtube.com/watch?v=FTFaQWZBqQ8

- Beginning graphic design https://edu.gcfglobal.org/en/beginning-graphic-design/
- Gareth graphic studio https://www.youtube.com/c/GarethDavidStudio
- Example here with Nintendo.com https://www.figma.com/file/ahSnWRZeKBO62oJDiXltxY/UI-III---Ex-2

/!\ The screenshots date back to nov 2021. They may differ from the current version of Nintendo.com http://Nintendo.com but the rules are the same

Chapter V

Exercise 02: UI III - Ex 3 - Accessibility (website)

	Exercise 02
UI III - Ex 3 - Accessibility (website)	
Turn-in directory : `ex02/`	
Files to turn in : `ex02/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Choose a website you find particularly accessible. Find at least 3 concrete examples of accessible measures and explain how they ease the reading or perception of visual content.

Deliverables:

- A 3-page Figma file with 3 different elements from a website (it can be from 3 different websites) that are accessible. The three measures must be different.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

- Why prioritze web accessibility https://blog.hubspot.com/service/why-prioritize-web-accessibility

Criteria:

- Examples of measures
  - Color contrast
  - Highlighted or enlarged text when hovering
  - Links color that is different from the body text's
  - Breadcrumbs to indicate where you are in terms of navigation
  - In forms, the title of the case should be above the text zone
  - Error states
  - etc.

Chapter VI

Exercise 03: UI III - Ex 4 - Accessibility (App)

	Exercise 03
UI III - Ex 4 - Accessibility (App)	
Turn-in directory : `ex03/`	
Files to turn in : `ex03/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Choose an app you find particularly accessible. Find at least 3 concrete examples of accessible measures and explain how they ease the reading or perception of visual content.

Deliverables:

- A 3-page Figma file with 3 different elements from an app (it can be from 3 different apps) that are accessible. The three measures must be different.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Criteria:

- Examples of measures
  - Color contrast
  - Highlighted or enlarged text when hovering
  - Links color that is different from the body text's
  - Breadcrumbs to indicate where you are in terms of navigation
  - In forms, the title of the case should be above the text zone
  - Error states
  - etc.

Chapter VII

Exercise 04: UI III - Ex 5 - Breadbcrumbs

	Exercise 04
UI III - Ex 5 - Breadbcrumbs	
Turn-in directory : `ex04/`	
Files to turn in : `ex04/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Browse the internet and find at least 5 different examples of breadcrumbs from websites or apps.

Deliverable:

- A Figma file gathering 5 screenshots of breadcrumbs.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- What are breadcrumbs? https://www.seoptimer.com/blog/breadcrumbs-website/

Chapter VIII

Exercise 05: UI III - Ex 6 - Toggle buttons

	Exercise 05
UI III - Ex 6 - Toggle buttons	
Turn-in directory : `ex05/`	
Files to turn in : `ex05/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Browse the internet and find at least 5 different examples of toggle buttons from websites or apps.

Deliverable:

- A Figma file gathering 5 screenshots of toggle buttons.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Toggle Switch - Tips https://uxplanet.org/toggle-switch-5-simple-design-tips-for-better-design-b4046eff4a2f

Chapter IX

Exercise 06: UI III - Ex 7 - Radio Buttons

	Exercise 06
UI III - Ex 7 - Radio Buttons	
Turn-in directory : `ex06/`	
Files to turn in : `ex06/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Browse the internet and find at least 5 different examples of radio buttons from websites or apps.

Deliverable:

- A Figma file gathering 5 screenshots of radio buttons.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- What is a radio button? https://www.justinmind.com/blog/radio-button-design-examples/

Chapter X

Exercise 07: UI III - Ex 8 - Calendars

	Exercise 07
UI III - Ex 8 - Calendars	
Turn-in directory : `ex07/`	
Files to turn in : `ex07/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Browse the internet and find at least 5 different examples of calendars from websites or apps.

Deliverable:

- A Figma file gathering 5 screenshots of calendars.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Chapter XI

Exercise 08: UI III - Ex 9 - Time pickers

	Exercise 08
UI III - Ex 9 - Time pickers	
Turn-in directory : `ex08/`	
Files to turn in : `ex08/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Browse the internet and find at least 5 different examples of time pickers from websites or apps.

Deliverable:

- A Figma file gathering 5 screenshots of time pickers.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Chapter XII

Exercise 09: UI III - Ex 10 - Micro-interactions

	Exercise 09
UI III - Ex 10 - Micro-interactions	
Turn-in directory : `ex09/`	
Files to turn in : `ex09/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Browse the internet and find at least 5 different examples of feedback micro-interactions or micro-animations on websites or apps.

Be careful! Feedback is helpful to provide information to the user, not just showing a catchy design. You need to make the difference.

Deliverable:

- A Figma file gathering 5 examples of **feedback** micro-interactions or animations. In each example, show the different versions of the element.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Why use micro-interactions in your design https://hike.one/update/why-use-micro-animations-in-your-design

- Micro-interactions: why, when, and how to use them to boost the UX https://uxdesign.cc/micro-interactions-why-when-and-how-to-use-them-to-boost-the-ux-17094b3baaa0

Tips:

- Feedback is the situation when the app specifically sends a piece of information to the user, like:
- Payment accepted
- Refreshed feed
- Information saved
- etc.

Chapter XIII

Exercise 10: UI III - Ex 11 - Consistency

	Exercise 10
UI III - Ex 11 - Consistency	
Turn-in directory : `ex10/`	
Files to turn in : `ex10/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Pick a website or an app of your choice*. Highlight 5 signs of consistency across the pages.

*Airbnb, Google, Apple, Amazon, Facebook, Instagram and WhatsApp are not accepted.

Deliverable:

- A Figma file gathering at least 5 signs of consistency.
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- 7 tips for designing consistency https://designshack.net/articles/graphics/7-tips-for-designing-consistency/
