Let's fight harassment

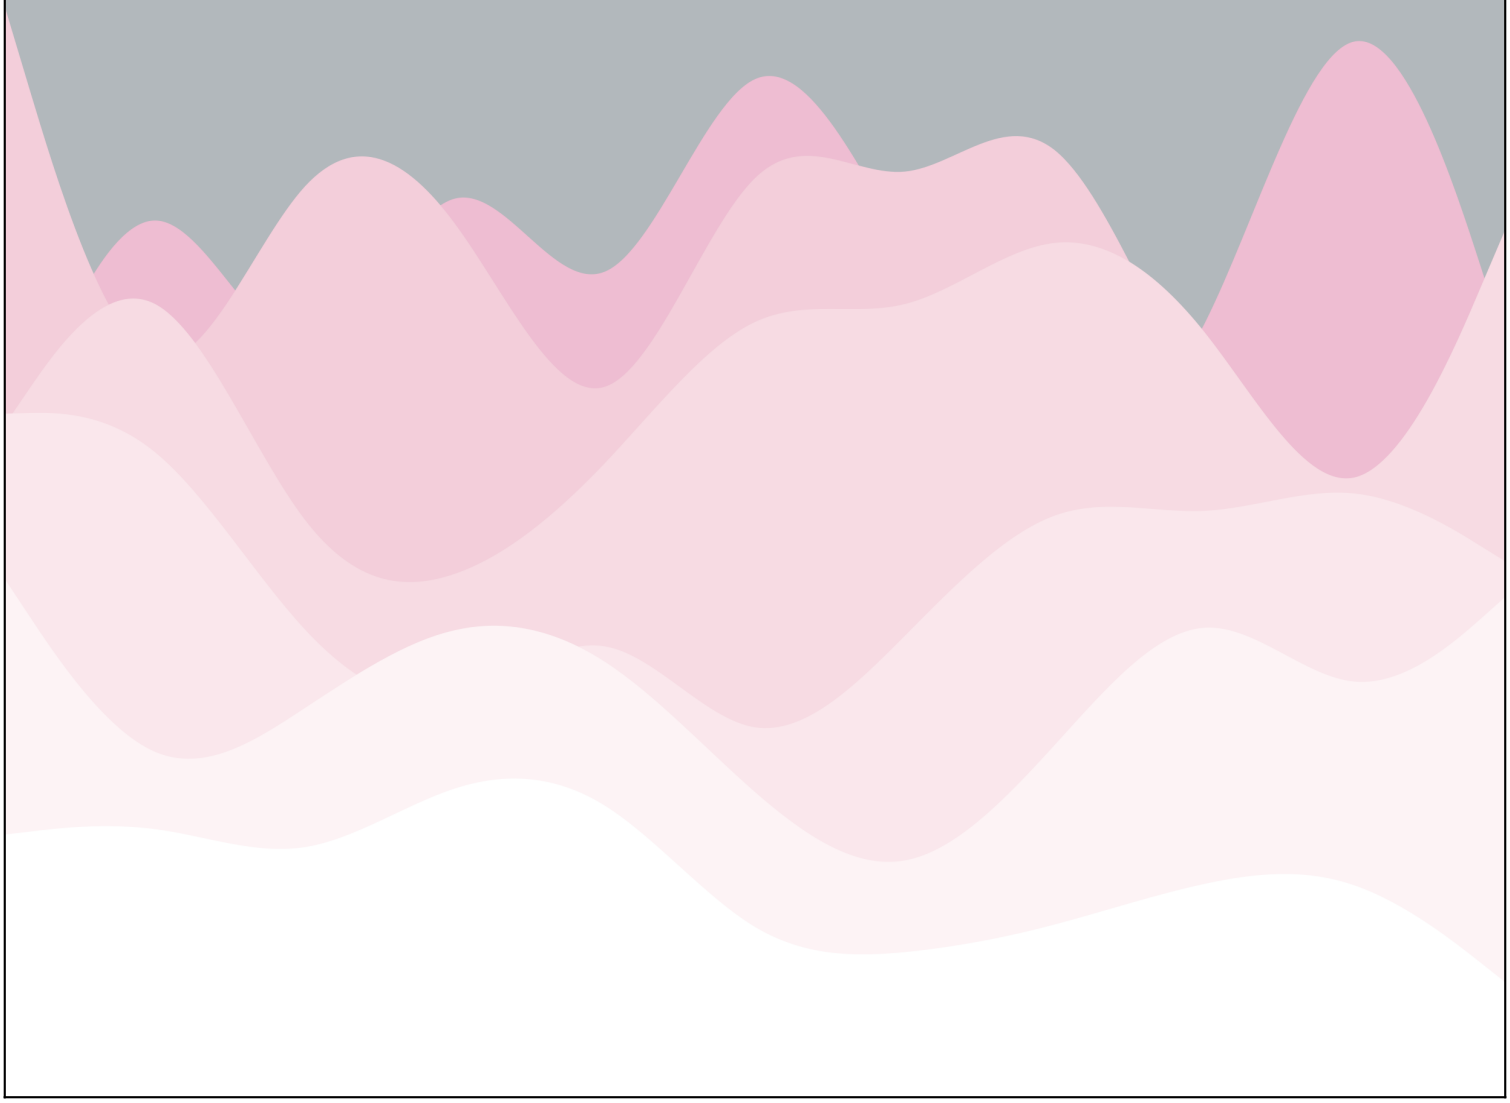

Piscine UX/UI — UX

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: Research and a public message. The brief is not a script.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

VII Exercise 04: UX III - Ex 5 - Personas 12
VIII Exercise 05: UX III - Ex 6 - User Journey 14
IX Exercise 06: UX III - Ex 7 - Problem Statement 16

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The picture in the foreword is not a hint. The pale steps behind the text are the page ground.

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

A poster is a sentence a street can read. A. M. Cassandre treated the poster as a public voice, not as a decoration (see the posters gathered by the MoMA, https://www.moma.org/artists/1015). This quest asks for that kind of voice: a message aimed at a real audience. It does not ask you to depict harm, and it does not hand you the message.

Picture: JeuneCrack

Recommended watching. The videos are context. They are not the deliverable.

- UX - Introduction & Quest n°1, 01Edu https://www.youtube.com/watch?v=UbE6WMeuvQg&list=PLHyAJ_GrRtf-RAtfngbRrFh1XDTnyXFDe

Chapter III

Exercise 00: UX III - Ex 1 - Competitive Analysis

	Exercise 00
UX III - Ex 1 - Competitive Analysis	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Context:

Quest n°3 is about Empathy.

In this scenario, the principal of your high school heard you were a designer. They chose to reach you to help them face school harassment among teenagers.

School harassment describes school-based harassment behaviors. It is characterized by the repeated use of violence, including mockery and other humiliations.

As a matter of fact, they realized they didn't know this generation (15 to 18-year-olds) very well. So they are asking you to conduct user research to meet this population and understand them.

Your job is to explore your topic and use various tools included in this "Empathize" phase.

Instructions:

Conduct a competitive analysis among 10 associations or organizations fighting school harassment.

You can pick 10 organizations worldwide, or from your home region or home country. Let's browse!

Compare these 10 organizations' main actions, channels, values, according to the criteria you assume are relevant.

Deliverables :

- A competitive report with an introduction that explains your main conclusions (PDF)

- A chart to show the competitive landscape, with 2 axes of your choice (digital, psychological, local, closeness to students, institutional, etc.) (PDF)
- A table to compare the organizations on 5 to 10 criteria (PDF)
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Competitive Analysis: How to approach it effectively https://uxdesign.cc/competitive-analysis-how-to-approach-it-effectively-def97d130d2c

Quote :

- 'Always design a thing in its larger context: a chair in a room, a room in a house, a house in an environment, an environment in a city plan' Eero Sarrinen | Knoll
- Creating a great design isn't just about understanding what the user wants. It's also about understanding and delivering on what the business needs.

Chapter IV

Exercise 01: UX III - EX 2 - Surveys

	Exercise 01
UX III - EX 2 - Surveys	
Turn-in directory : `ex01/`	
Files to turn in : `ex01/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Prepare a survey to gather quantitative data from your users.

And remember, you are not your user!

To be used in proper studies and get viable results, a form should gather at least 100 answers. The answers should give you countable data you can use to prove a point and confirm trends, not verbatims or details.

Deliverables:

- A PDF document including your objective(s) and your hypotheses, the questions, an introduction and a conclusion.
- In the document, add the link to a survey ready to be spread
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

Here are the recommended steps :

1. Define your objective, what you are looking for when spreading your form to people. Usually, this has to do with figures, proportions, etc. 2. Write down 1 to 3 hypotheses you have regarding this topic, that you need to either confirm or disprove. 3. Pick 3 to 5 main topics you need to get information on. 4. For each topic, write 1 to 3 closed-ended questions. Remember, your user has to answer with a choice in a list of prepared answers or use the option "other" to write down the answer they can't find in the prepared list. 5. Write some screening questions to have a few pieces of demographics (age, job, location, etc.). This allows you to make sure the answers you get are from your target. 6. Structure your questions in a funnel: start with broad questions to focus on specific topics or situations. Remember to stay neutral in your tone to ket the user tell their own story. Try to focus on 10 main questions. 7. Write a greeting introduction, describing briefly (1) who you are and (2) what you are looking for. No need to say too much, but enough to provide a framework and the purpose of the form. 8. Write a conclusion to thank your user for their time, and prepare the next steps. Ex: ask to have this form spread to 3 people, etc.

Mandatory: ask them if they would be available for an anonymous in-person interview (over the phone, in-person, through video chat: whatever they are more comfortable with) because you'll have to conduct at least 3 interviews further on.

- Google Forms https://docs.google.com/forms/u/0/

Quotes:

- "Surveys measure and categorize attitudes or collect self-reported data that can help track or discover important issues to address." Norman Nielsen Group
- Surveys are not accurate in providing behavioural data because USERS OMIT STEPS IN THE MIDDLE AND MEMORIES ARE FAULTY.

Chapter V

Exercise 02: UX III - Ex 3 - Broadcast strategy

	Exercise 02
UX III - Ex 3 - Broadcast strategy	
Turn-in directory : `ex02/`	
Files to turn in : `ex02/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Define and run your broadcast strategy among teenagers (15-18 years old)

Even though a proper survey requires at least 100 answers, for this exercise we request you to get 40.

Deliverables:

- A PDF document gathering your strategy. Please include:
  - Who you are targeting (remember, you can focus on your hometown as well as the whole planet)
  - A few ideas about how to reach them
  - The channels you intend to use - be specific and include the links to the groups, forums, pages, account you plan to reach
  - At least 2 different messages
  - A plan A, a plan B, a plan C
- A document to express your main feedback after running your broadcast strategy: what worked best? have you encountered any difficulties? What were they? How did you overcome them?

- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:
In order to do so, you need to be creative and strategic!

- Who are you targeting? Teenagers, bullies, persecutor, witnesses, parents, teachers, people in the administration? From where?
- How can you reach them? Through which channels? On which forums, groups, with which hashtags? Will you try to get them through influencers?
- What words and what tone will you use?
- How will you approach them? What message will you write?
- What have you planned if they don't answer right away?

Once your strategy is prepared, run it!

Chapter VI

Exercise 03: UX III - Ex 4 - Interviews

	Exercise 03
UX III - Ex 4 - Interviews	
Turn-in directory : `ex03/`	
Files to turn in : `ex03/Figma file and PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

- Create an interview guide
- Conduct 3 interviews with teenagers

After knowing more about trends and "What" people do thanks to surveys, the main goal is to understand "why".

Deliverables:

- A PDF document with an interview guide
- A PDF document with 3 scripts
- An affinity diagram from your interviews (PDF or digital, on Miro or Figma for example)
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.

- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Respondent - Tool to find users https://www.respondent.io
- How to conduct user interviews https://uxdesign.cc/how-to-conduct-user-interviews-fe4b8c34b0b7?sk=9625632a522a9309a91297191e668565
- How to design better products through user interviews https://uxdesign.cc/how-to-design-better-products-through-user-interviews-4c5142bb1fc4
- Asking the right questions https://uxdesign.cc/asking-the-right-questions-on-user-research-interviews-and-testing-427261742a67

Tips:

Here are the recommended steps :

1. Define your objective, what you are looking for when interviewing people. Usually, this has to do with your user's habits, and the most painful problems they have regarding this topic. 2. Write down 1 to 3 hypotheses you have regarding this topic, that needs to be either confirmed or disproved. 3. Pick 3 to 5 main topics you need to get information on. 4. For each topic, write 1 to 3 open-ended questions. Remember, your user cannot answer with "Yes" or "No"! Ex: How, Why, What, When, Tell me about the last time you did... etc. If you really need to introduce a new topic by a close-ended question, ask why right after. 5. Write some screening questions to have a few pieces of demographics (age, job, location, etc.) 6. Structure your questions in a funnel: start with broad questions to focus on specific topics or situation. Remember to stay neutral in your tone to let the user tell their own story. Try to focus on 10 main questions. 7. Write a greeting introduction, describing briefly (1) who you are and (2) what you are looking for. No need to say too much, but enough to provide a framework and the purpose of the interview. 8. Write a conclusion to thank your user for their time, and prepare the next steps. Ex: ask to be put in touch with someone they know and who could be interested in this topic, etc.

Chapter VII

Exercise 04: UX III - Ex 5 - Personas

	Exercise 04
UX III - Ex 5 - Personas	
Turn-in directory : `ex04/`	
Files to turn in : `ex04/Figma file and PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Let's create a persona based on your quantitative research and your interviews.

Your persona card should include common trends amongst the people you got data from (habits, verbatims, fears, drivers, frustration, and pain points).

Reminder: Your persona is fictional and should not have the exact name or picture as someone you interviewed, but remember a persona is here so you can make decisions as a designer.

Deliverables:

- A PDF persona card extracted from a Figma file
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Make your persona great again https://uxdesign.cc/personas-e60c1c06ead1
- Persona, journey maps, user flow, site map, OH MY! https://uxdesign.cc/personas-journey-maps-site-maps-and-user-flows-oh-my-e71d044b4bcb

- Persona framework https://miro.medium.com/max/1400/0*RbHfR6BHhhFIENNf

Quotes:

- If you design for everyone, you delight no one.
- A good user persona is the one based on user research, without regard to how many attributes we can describe.

Chapter VIII

Exercise 05: UX III - Ex 6 - User Journey

	Exercise 05
UX III - Ex 6 - User Journey	
Turn-in directory : `ex05/`	
Files to turn in : `ex05/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Now you have your persona, it's time to set it in motion.

Design a User Journey to represent your persona in their environment across the time, with key steps or actions related to our current topic (harassment).

The timeline can be of a day, a few hours, or a week. Please include the key moments related to harassment alongside the emotions related to each step. Use the material from your interviews and surveys.

Then, highlight the main pain points that need to be solved.

Deliverable:

- A Figma document with your persona's user journey
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

Most articles you'll find will be about user journeys or customer journeys. Keep in mind that you can adapt this methodology to any persona with any kind of situation or process, even at school, outside the school, in the digital world, etc.

- Example https://d2slcw3kip6qmk.cloudfront.net/marketing/blog/2017Q3/SEO-initiative-customer-journey-mapping/CustomerJourneyMap1.png

Quotes:

- "More options = More problems." Scott Belsky | VP of Product & Community Adobe
- 'A customer journey map is a visualization of the process that a person goes through in order to accomplish a goal. It's used for understanding and addressing customer needs and pain points' Norman Nielsen Group

Chapter IX

Exercise 06: UX III - Ex 7 - Problem Statement

	Exercise 06
UX III - Ex 7 - Problem Statement	
Turn-in directory : `ex06/`	
Files to turn in : `ex06/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions: Based on your previous work, your persona and your user journey's main painpoint, define a problem statement that would clarify the main problem you want to tackle. You may use the How Might We exercise in pairs.

Then, define 3 KPIs (Key performance Indicators) that will help you measure the definition of Done and the success of the solution.

Deliverables:

- A PDF document with one problem statement and 3 KPIs to measure the impact of the solution
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!
