Piscine UX/UI — UX

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: Heuristics, map, jobs to be done, sorting, wireframes, tests.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

Contents

I Instructions 2
II Foreword 3
III Exercise 00: UX V - Ex 1 - Heuristics 4
IV Exercise 01: UX V - Ex 2 - Site map 6
V Exercise 02: UX V - Ex 3 - JTBD 8
VI Exercise 03: UX V - Ex 4 - Card sorting 10
VII Exercise 04: UX V - Ex 5 - Wireframes 12
VIII Exercise 05: UX V - Ex 6 - Test protocol 14
IX Exercise 06: UX V - Ex 7 - Run 5 tests 16

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The picture in the foreword is not a hint. The pale steps behind the text are the page ground.

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

Paula Scher's covers for CBS Records are loud on purpose: the sleeve is the promise, the track is the proof. *High Fidelity* (Stephen Frears, 2000) is the other half of the same joke, a man who sorts records because sorting is how he thinks. This quest sorts a music service. The film is not the card sort.

Picture: JeuneCrack

Recommended watching. The videos are context. They are not the deliverable.

Chapter III

Exercise 00: UX V - Ex 1 - Heuristics

	Exercise 00
UX V - Ex 1 - Heuristics	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Context:

A music label specialized in music from South America asks you to improve the user experience. This quest is about heuristics and content organization!

Instructions:

Conduct a heuristic analysis on **one** of these websites:

- Universal Music Latin America https://www.universalmusica.com/
- Delta Records https://deltarecords.net/
- Zoho Music https://www.zohomusic.com/
- Luaka Bop https://www.luakabop.com/
- Rimas Music https://rimasmusic.com/
- More... as long as it is a South American music label ;-)

Deliverables:

- A duplicated and completed chhecklist on a sheet document (Google Sheets, Airtable, Excel, etc.)
- Tool : Heuristic evaluation checklist https://drive.google.com/file/d/10KbfbNZA1oVS1sXbjjXLPPmdZ6nqVkdc/view

- Upload the document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

'If you think design is expensive, you should look at the cost of bad design' Ralf Speth | Former CEO Jaguar Land Rover

Chapter IV

Exercise 01: UX V - Ex 2 - Site map

	Exercise 01
UX V - Ex 2 - Site map	
Turn-in directory : `ex01/`	
Files to turn in : `ex01/Figma file and PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Stick to the website you have chosen in Ex.1 and design a site map. The site map should include all the pages of the website as well as the connections and hierarchy.

List of websites:

- Universal Music Latin America https://www.universalmusica.com/
- Delta Records https://deltarecords.net/
- Zoho Music https://www.zohomusic.com/
- Luaka Bop https://www.luakabop.com/
- Rimas Music https://rimasmusic.com/
- More... as long as it is a South American music label ;-)

Deliverables:

- A PDF page of the site map.
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.

- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Start by drawing on paper, then pass it on to a digital tool.
- Please label your document! Title and name of the website.

Resources:

- How to create a good site map https://www.smokeylemon.com/blog/how-to-create-a-good-sitemap/

Recommended tools:

- Figma
- Adobe Illustrator
- etc.

'The organization, search, and navigation systems that help people to complete tasks, find what they need, and understand what they've found' Peter Morville | Information Architecture for the WWW

Chapter V

Exercise 02: UX V - Ex 3 - JTBD

	Exercise 02
UX V - Ex 3 - JTBD	
Turn-in directory : `ex02/`	
Files to turn in : `ex02/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Let's practice Jobs-to-be-done to be more specific about how a music label website could be improved.

Read about Jobs-to-be-Done and the psychologic dimension behind this tool.

Then, find someone (your "user") around you who likes music a lot.

Ask them about what they would do on a music label website. Ask them why, why and why to understand the emotion behind an action, and the purpose behind a simple visit on a website.

Complete the JTBD template below including the true purpose of your "user".

And remember: You are not your user!

Deliverable:

- A complete Jobs-to-Be-Done on a PDF document
    - "When _____, I want to _____ So I can _____"
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- What is a job to be done? https://jobs-to-be-done.com/what-is-jobs-to-be-done-fea59c8e39eb
- Jobs-to-be-done framework https://www.productplan.com/glossary/jobs-to-be-done-framework/
- https://jobs-to-be-done.com/ https://jobs-to-be-done.com/
- "When we buy a product, we essentially 'hire' it to help us do a job. If it does the job well, the next time we're confronted with the same job, we tend to hire that product again. If it does a crummy job, we 'fire' it." Clayton M Christensen 'Know your customers: JtBD"

Quote:

- 'When we identify user stories early in the design process, we let them dictate the design decisions. Rather than let our preconceived ideas of how the product should be or should look do it.' UX Booth
- Documenting the what and why of each element promotes organization and makes the handoff to the development team much smoother.' UX Booth

Chapter VI

Exercise 03: UX V - Ex 4 - Card sorting

	Exercise 03
UX V - Ex 4 - Card sorting	
Turn-in directory : `ex03/`	
Files to turn in : `ex03/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

In the present situation, the websites are not ideal to complete the Jobs-to-be-Done your user has in mind. So let's practice card sorting to rearrange the content of the website!

Organize a card sorting workshop with the content of the website you chose in Ex. 1.

To do so:

- Define your research goals
- Prepare the material
- Find participants
- Run a card sorting workshop on 5 people
- Suggest a new taxonomy (content organization)

List of websites:

- Universal Music Latin America https://www.universalmusica.com/
- Delta Records https://deltarecords.net/
- Zoho Music https://www.zohomusic.com/
- Luaka Bop https://www.luakabop.com/

- Rimas Music https://rimasmusic.com/
- More... as long as it is a South American music label ;-)

Deliverables:

- A card sorting workshop script with the research goals (PDF document)
- Pictures of the ongoing workshop
- A document to show the new content organization (it can be a picture of the board with sticky notes or the digital version).
- Upload the documents on Github, in a zip folder named "ProjectTitle_ Name_FirstName", with all project deliverables as follows: "Name_FirstName_ DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Basics on how to conduct card sorting https://uxdesign.cc/basics-on-how-to-conduct-card-sorting-6e4ccc7cc261?sk=cafd49e16c71a72c3fad93e63c1998f1

Chapter VII

Exercise 04: UX V - Ex 5 - Wireframes

	Exercise 04
UX V - Ex 5 - Wireframes	
Turn-in directory : `ex04/`	
Files to turn in : `ex04/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Pick a product (a record, a song or an album) from your music label website.

Based on the new taxonomy (content categorization), show the different paths a user has to take to reach the product with a series of wireframes.

Tips:

- Drawing a user journey first might be helpful before rushing into wireframes
- Drawing paper prototypes before going digital might save you some time ;)
- Several paths are encouraged

Vocabulary

- Low-Fidelity: Paper Prototypes - Example here https://miro.medium.com/max/1400/1*5nUfqqA2gjdAYHagjbHA5w.jpeg
- Mid-Fidelity: Wireframes - black and white, only the main elements, on digital prototype tools - Example here https://miro.medium.com/max/1400/1*eGSfaxwYbxUFomYbyO6GWw.png
- High-Fidelity: Wireframes with color, styles, graphical details, and micro-interactions - Example here https://miro.medium.com/max/1400/1*XnOHSKAvhr4TZzC9lN5udw.gif

List of websites:

- Universal Music Latin America https://www.universalmusica.com/
- Delta Records https://deltarecords.net/
- Zoho Music https://www.zohomusic.com/
- Luaka Bop https://www.luakabop.com/
- Rimas Music https://rimasmusic.com/
- More... as long as it is a South American music label ;-)

Deliverables:

- Wireframes (6 to 12 screens) from the home page to the product page, on Figma
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_ DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_ John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

Recommended tools:

- Figma

Chapter VIII

Exercise 05: UX V - Ex 6 - Test protocol

	Exercise 05
UX V - Ex 6 - Test protocol	
Turn-in directory : `ex05/`	
Files to turn in : `ex05/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Prepare a protocol for usability testing.
Deliverable:

- A PDF document with a test protocol
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips: Recommended steps

- Define the scope of the test
- Recruit 5 users
- Identify objectives: What are you proving?
- Establish metrics: How are you proving your design is efficient?

- Describe the steps and the instructions
- Write an introduction to greet ther user
- Write a conclusion to thank the user

Resources

- How to do a user interview (tutorial from Google Ventures) https://www.youtube.com/watch?v=Qq3OiHQ-HCU

Quote:

You need to detect: How many errors do users make? How severe are these errors? How easily can they recover from the errors?

Chapter IX

Exercise 06: UX V - Ex 7 - Run 5 tests

	Exercise 06
UX V - Ex 7 - Run 5 tests	
Turn-in directory : `ex06/`	
Files to turn in : `ex06/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Run the test on 5 people!
Deliverables:

- Pictures of the ongoing test
- A PDF document with the conclusions from each test and 3 major ideas to improve the prototype
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Running a usability test https://www.usability.gov/how-to-and-tools/methods/running-usability-tests.html
