The public Market caters to all classes of people and offers goods to the consumer on the very lowest margin. Cheap rents, cash trade and heavy patronage make this possible.

Your neighbor has saved money during the past year by trading at the Public Market. Why not you?

Let's fair trade

Piscine UX/UI — PR

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: A fair-trade service. Research first, interface second.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

Contents

I	**Instructions**	**2**
II	**Foreword**	**3**
III	**Exercise 00: Project 3: Let's fair trade**	**4**
IV	**Exercise 01: Project 3: Let's fair trade**	**8**

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The mark on the cover is the picture of this module. The pale steps behind the text are the page ground. Neither one is a hint.

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

The Max Havelaar mark is a label people learned to look for on a shelf. A label is not a product, and a moodboard is not a cooperative. The brief in the exercises is the contract. The label's history is only the reminder that trust is printed.

Picture: unidentified, Public domain

Recommended watching. The videos are context. They are not the deliverable.

Chapter III

Exercise 00: Project 3: Let's fair trade

	Exercise 00
Project 3: Let's fair trade	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/zip archive, named Name_FirstName_ DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Creation of an ecommerce platform for second-hand clothes on desktop and mobile

Bruno loves fashion. He loves buying clothes! As he is cautious with the environment, he prefers buying second-hand clothing. However, the existing platforms are not very user-friendly.

'I need to know more about the environmental impact of the pieces I buy. I'd like to know how old they are, where they are coming from, to measure their life and the amount of kilometres they have traveled. When a new pair of jeans arrive at the ready-to-wear store in Europe, they consumed approximately 11,000 litres of water and travelled 65,000 kilometres. I'd like to monitor that kind of data.'

You gather a team of 3 to think and design a website and an app for second-hand products.

You have to meet Bruno after 2 weeks to give a first presentation of your work, after completing a tested mid-fidelity prototype.

The final presentation of your work will take place 2 weeks after the mid presentation, where you'll show a tested high-fidelity prototype.

Estimated time: 4 weeks

Team size: 3 people max

Guidelines:

- You may consider building your UX and UI strategy before jumping in. Remember to question the initial brief with user research.
- Beware all the steps of the design process: Empathy, Define, Problem Statement, Ideation, Prototype, Test.
- You must interview or ask real people during the Empathy / User Research and Test phases.
- In both phases, you must test your prototypes with at least 5 people.
- Make a presentation as if you were showing your work to Bruno. Make sure there are at least 5 people in the audience.

- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!
- Prepare a feedback form to send the audience. The form must include at least the questions listed below.
- In both presentations, you are presenting to Barbara and her team.
- Timing: 10 minutes for the presentation and 5 minutes for Q&A.
- You may use the presentation audits to structure your presentations.
- Have fun!

Tools:

- Google Forms https://docs.google.com/forms/u/0/
- Airtable https://www.airtable.com/
- Typeform https://www.typeform.com/

Tips:

- Effective presentation skills https://academic.oup.com/femsle/article/364/24/fnx235/4587905

Intermediate deliverables:
Quote:
"Your mission in any presentation is to inform, educate, and inspire." Robert Ballard

Phase 1: Mid-project presentation audit
Make sure:

- At least 5 people are attending the presentation
- The presentation is about the whole UX process, including:
  - The intial brief
  - A project planning, including the UX phases, the tools chosen, the timeline
  - User research findings from qualitative and quantitative research (persona, figures, etc.)
  - A problem statement to adapt the initial brief based on the research findings
  - An introduction of the concept that came out of the ideation

  - The animated mid-fidelity prototype (a demo-video)
  - The main feedback from usability testing
  - The next steps of the project
- The presentation does not exceed 10 minutes
- Feedback forms have been shared at the beginning of the presentation
- You had fun!

Phase 2: Final presentation audit
Make sure:

- At least 5 people are attending the presentation
- The presentation is about the UI process, including:
  - A quick reminder of the previous presentation
  - A project planning, including the UI phases, the tools chosen, the timeline
  - A moodboard
  - A styleguide (colors, branding, typography, some elements of the library)
  - The animated high-fidelity prototype (a demo-video)
  - The main feedback from usability and desirability testing
  - The next steps of the project
- The presentation does not exceed 10 minutes
- Feedback forms have been shared at the beginning of the presentation
- You had fun!

Questions to ask in the feedback forms

- What do you remember of this presentation?
- On a scale from 0 to 10, how clear was the speech?
- Why?
- On a scale from 0 to 10, how engaging was the presentation?
- Why?
- On a scale from 0 to 10, how coherent was the presentation?
- Why?
- On a scale from 0 to 10, how impactful were the visuals?
- Why?

- On a scale from 0 to 10, how clear was the problem?
- Why ?
- On a scale from 0 to 10, how well does the prototype answers the problem?
- Why?
- What recommendation would you like to make to improve this presentation?
- Why?
