

Going on holidays with friends

Piscine UX/UI — UX

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: From an interview guide to a prototype of a shared trip.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

Contents

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The mark on the cover is the picture of this module. The pale steps behind the text are the page ground. Neither one is a hint.

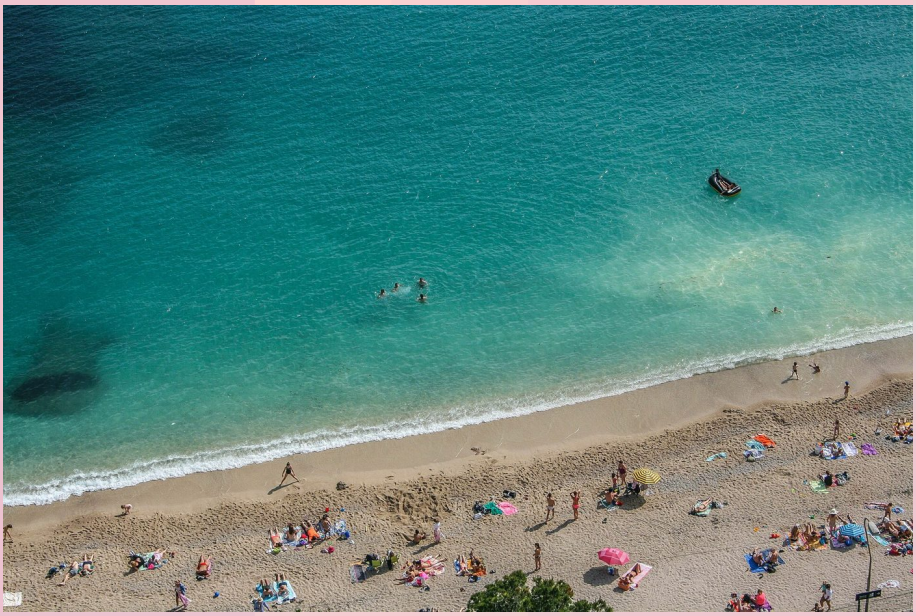

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

Monsieur Hulot arrives at the beach with a suitcase and no product roadmap (*Les Vacances de Monsieur Hulot*, Jacques Tati, 1953). The joke of the film is that everyone shares the same shore and nobody shares the same plan. Your job this quest is to find that mismatch by talking to people, not to restage Tati.

Picture: Callum Galloway callumgalloway, CC0

Recommended watching. The videos are context. They are not the deliverable.

Chapter III

Exercise 00: UX II - EX 1 - Interview guide

	Exercise 00
UX II - EX 1 - Interview guide	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Context:

Welcome to the 2nd quest.

Your mission, should you choose to accept it, is to focus on going on holidays with friends. As you may have noticed, experiencing weekends or other kinds of holidays is super nice, but may lead to some moments of irritation.

So this project's goal is to make holidays more comfortable fo everyone. But first, as in all design processes, you need to understand the real problem behind stressful moments!

Instructions:

You need to create an interview guide to get information from your user.

And remember, you are not your user!

Deliverable:

- A PDF document with an interview guide
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips: Here are the recommended steps :

1. Define your objective, what you are looking for when interviewing people. Usually, this has to do with your user's habits, and the most painful problems they have regarding this topic. 2. Write down 1 to 3 hypotheses you have regarding this topic, that needs to be either confirmed or disproved. 3. Pick 3 to 5 main topics you need to get information on. 4. For each topic, write 1 to 3 open-ended questions. Remember, your user cannot answer with "Yes" or "No!" Ex: How, Why, What, When, Tell me about the last time you did... etc. If you really need to introduce a new topic by a close-ended question, ask why right after. 5. Write some screening questions to have a few pieces of demographics (age, job, location, etc.) 6. Structure your questions in a funnel : start with broad questions to focus on specific topics or situations. Remember to stay neutral in your tone to let the user tell their own story. Try to focus on 10 main questions. 7. Write a greeting introduction, describing briefly (1) who you are and (2) what you are looking for. No need to say too much, but enough to provide a framework and the purpose of the interview. 8. Write a conclusion to thank your user for their time, and prepare the next steps. Ex: ask to be put in touch with someone they know and who could be interested in this topic, etc.

- Podcast recommendation: How to Ask Great UX Research Questions https://open.spotify.com/episode/5UlvTKyVObeCDxkc8DAakU?si=fjMEHCdjRXWkYhwKhxIopQ

Quote:

"To ask open-ended questions is the best approach, but it's easy to get into the weeds in data analysis when every answer is a paragraph or two of prose. Users quickly tire of answering many open-ended questions, which usually require a lot of typing and explanation." Norman Nielsen Group

Chapter IV

Exercise 01: UX II - Ex 2 - Run interviews

	Exercise 01
UX II - Ex 2 - Run interviews	
Turn-in directory : `ex01/`	
Files to turn in : `ex01/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Run 6 interviews. Go in pairs, one being the interviewer and the other the note taker. Go outside! Meet random people in cafés, at the bus, on city squares, in parks, on benches, introduce yourself and ask for 15 minutes of their time. Run your interview guide and write down anything that could be helpful, like reactions, hesitations, etc. You can use a dictaphone to make sure you're not missing anything. But in this case, let the interviewee know and ask for their permission! You can offer them a coffee to thank them, sometimes a smile suffices! At least 3 of your interviews must be with strangers. You'd be surprised how people are happy to help and looooove talking about themselves.

Then, write down the script on a written document, and give elements of context regarding each interview (place, time, name, etc.)

Deliverables:

- A PDF document with the scripts from all the 6 interviews.
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Chapter V

Exercise 02: UX II - Ex 3 - Affinity diagram & Empathy map

	Exercise 02
UX II - Ex 3 - Affinity diagram & Empathy map	
Turn-in directory : `ex02/`	
Files to turn in : `ex02/zip archive, named Name_FirstName_ DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Open your written scripts and extract the relevant information.

1. Use paper or digital sticky notes (Post-its or Miro.com) to isolate the pieces of information your interviewees shared with you. 1 idea, quote, or piece of information = 1 sticky note. 2. When all your scripts are written/typed down on sticky notes, gather them in clusters based on themes, opinions, habits, or anything they could have in common. 3. Label the clusters. 4. Draw conclusions 5. Fill an empathy map ONLY with the content from your affinity diagram.

Deliverables:

- An Affinity Diagram (pictures of the Affinity Diagram on paper or on digital tools like Miro)
- An Empathy Map (pictures of the Empathy Map on paper or on digital tools like Miro)
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_ VersionNumber". For example, the first deliverable can be named as "Doe_John_ MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Quote:
Remember, you are not the user, so your opinions are not absolute truth.

Chapter VI

Exercise 03: UX II - Ex 4 - Problem statement

	Exercise 03
UX II - Ex 4 - Problem statement	
Turn-in directory : `ex03/`	
Files to turn in : `ex03/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Based on your previous work and your empathy map, define a problem statement that would clarify the main problem you want to tackle.

You may use the How Might We exercise in pairs.

Deliverable:

- A PDF document with a problem statement starting with a "How Might We"
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resources:

- Stuck on a problem? Just ask how might we https://relab.academy/design-thinking/stuck-on-a-problem-just-ask-how-might-we/

'Out of clutter, find simplicity. From discord, find harmony. In the middle of difficulty, lies opportunity.' Albert Einstein

Chapter VII

Exercise 04: UX II - Ex 5 - Ideation

	Exercise 04
UX II - Ex 5 - Ideation	
Turn-in directory : `ex04/`	
Files to turn in : `ex04/zip archive, named Name_FirstName_ DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

To find creative solutions to your problem statement, use one of these techniques in groups of 5 people, twice.

Gather in groups of 2. During the first run, one is the facilitator and the other is the time-keeper and in charge of logistics. Switch roles for the second run.

Get as many ideas as possible within a defined timeframe, and narrow them down to 3 main ideas with a voting process (in pair or in group). Take pictures!

Deliverables:

- A PDF document that includes the script with all the steps + logistics
- Pictures of the 2 sessions
- A PDF document with 3 ideas that came out the 2 workshops.
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_ VersionNumber". For example, the first deliverable can be named as "Doe_John_ MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Chapter VIII

Exercise 05: UX II - Ex 6 - User flow

	Exercise 05
UX II - Ex 6 - User flow	
Turn-in directory : `ex05/`	
Files to turn in : `ex05/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Structure your main ideas into a comprehensive user flow. You can include one, two, of the three main ideas from your ideation process, depending on how consistent it would be for the users.

Deliverable:

- A comprehensive user flow on a board (digital or pictures of a paper version)
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Quote:

'Each use case is represented as a sequence of simple steps, beginning with a user's goal and ending when that goal is fulfilled.' Usability.gov

Chapter IX

Exercise 06: UX II - Ex 7 - Prototyping

	Exercise 06
UX II - Ex 7 - Prototyping	
Turn-in directory : `ex06/`	
Files to turn in : `ex06/Figma file, named Name_FirstName_ DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Give another dimension to your user flow and turn your user flow into a paper prototype (12 screens max).

- First, draw low-fidelity prototypes on paper. One main screen = 1 mobile frame. No micro-interactions nor multistate are needed for this exercise.
- Test the prototype with 3 people. To do so, prepare a usability testing guide following the Design Sprint Five-Act interview https://www.youtube.com/watch?v=U9ZG19XTbd4
- Then, draw your mid-fidelity screens on Figma with simple shapes, in black and white.

Deliverables:

- Pictures of a paper prototype
- Wireframes (mid-fi) to upload on the Figma file
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_ VersionNumber". For example, the first deliverable can be named as "Doe_John_ MidFiPrototype_05242024_V1".

Tips: Vocabulary

- Low-Fidelity: Paper Prototypes - Example here https://miro.medium.com/max/1400/1*5nUfqqA2gjdAYHagjbHA5w.jpeg

- Mid-Fidelity: Wireframes - black and white, only the main elements, on digital prototype tools - Example here https://miro.medium.com/max/1400/1*eGSfaxwYbxUFomYbyO6GWw.png
- High-Fidelity: Wireframes with color, styles, graphical details, and micro-interactions - Example here https://miro.medium.com/max/1400/1*XnOHSKAvhr4TZzC9lN5udw.gif
