

Heuristics

Piscine UX/UI — UI

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: An audit, then recommendations that name the criterion.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

Contents

I Instructions **2**

II Foreword **3**

III Exercise 00: UI V - Ex 1 - Audit **4**

IV Exercise 01: UI V - Ex 2 - Recommendations **6**

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The mark on the cover is the project logo. The picture in the foreword is the illustration of this module. The pale ground behind the text is the page watermark. None of them is a hint.

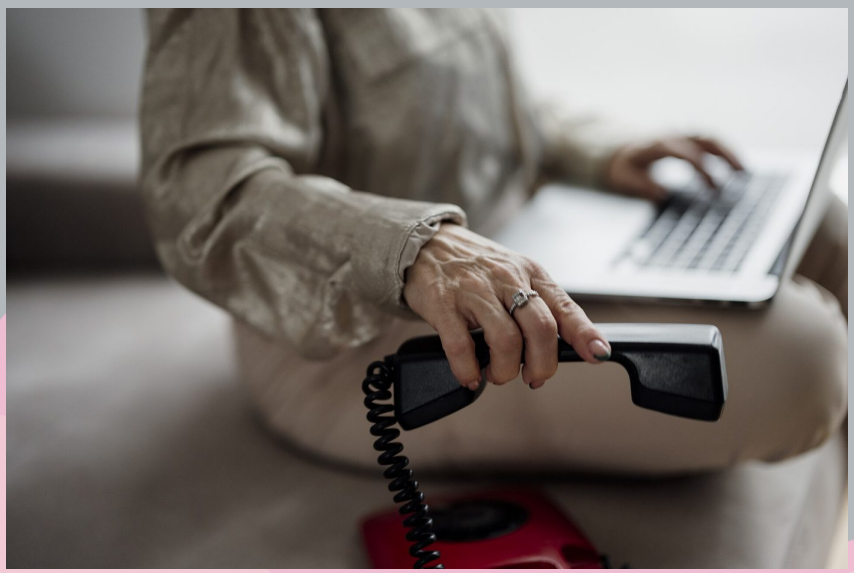

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

Steve Krug called the book *Don't Make Me Think* and then spent it watching people fail in silence. The title is the culture. The audit is yours. A list copied from a poster of ten slogans, with no screen attached, is not the exercise.

Chapter III

Exercise 00: UI V - Ex 1 - Audit

	Exercise 00
UI V - Ex 1 - Audit	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Context:

Welcome to this very last quest!

The point is to take on the role of a UX auditor. You'll be asked to make the audit of a website or an app, and then to write a series of recommendations to improve it.

Let's be critical, creative and impactful!

Instructions:

Run a heuristic audit on one of these 3 different websites or app:

- https://www.ikea.com/ https://www.ikea.com/
- https://www.doctorswithoutborders.org/ https://www.doctorswithoutborders.org/
- App WikiArt

Deliverables:

- A completed chart
- A report including the 5 recommended steps described below
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".

- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Recommended steps
    - Define the scope.

1. Know the business requirements and demographic of the end-users. 2. Decide on which reporting tools and heuristics to use (in this case: this heuristic evaluation checklist https://drive.google.com/file/d/10KbfbNZA1oVS1sXbjjXLPPmdZ6nqVkdc/view). 3. Evaluate the experience and identify usability issues. 4. Analyze and aggregate the data. 5. Present the results.

Chapter IV

Exercise 01: UI V - Ex 2 - Recommendations

	Exercise 01
UI V - Ex 2 - Recommendations	
Turn-in directory : `ex01/`	
Files to turn in : `ex01/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Based on the audit you made in Ex.1, write a set of 3 to 6 recommendations to improve heuristics and usability.

Websites or Apps:

- https://www.ikea.com/ https://www.ikea.com/
- https://www.doctorswithoutborders.org/ https://www.doctorswithoutborders.org/
- App WikiArt

Deliverable:

- A PDF document with 3 to 6 recommendations
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.

- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Classify your recommendations in heuristic criteria
