

The Olympics

Piscine UX/UI — UX

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: Ideation, flow, prototype, motion, and a test.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

V Exercise 02: UX IV - Ex 3 - Ideation 8
VI Exercise 03: UX IV - Ex 4 - User Flow 10
VII Exercise 04: UX IV - Ex 5 - Prototyping 12
VIII Exercise 05: UX IV - Ex 6 - Animation 14
IX Exercise 06: UX IV - Ex 7 - Test 15

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The mark on the cover is the project logo. The picture in the foreword is the illustration of this module. The pale ground behind the text is the page watermark. None of them is a hint.

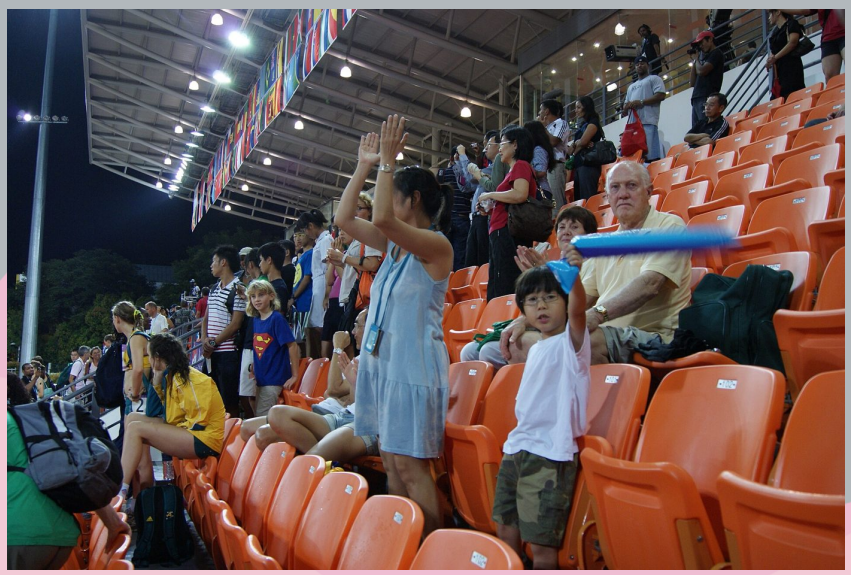

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

In 1972 Otl Aicher reduced a Games to a set of pictograms that a visitor could read without a shared language. Mexico 1968, under Lance Wyman, had already shown that an identity can be a system rather than a mascot. Look at the pictures if you want. The exercises still ask you to ideate, not to trace those signs.

Picture: Jacklee / CC BY-SA 4.0

Recommended watching. The videos are context. They are not the deliverable.

Chapter III

Exercise 00: UX IV - Ex 1 - Ideation

	Exercise 00
UX IV - Ex 1 - Ideation	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Context:

The Olympics committee calls on you to get fresh ideas for the next Olympic Games.

You'll team up by groups of 3 and focus each on one problem statement.

You'll get guidelines and suggestions to run ideation workshops, and bring your ideas to life with three different prototypes, that you will animate and test.

Instructions:

Let's be creative!

Organize and run an ideation workshop with 4 - 8 participants to find ideas to solve this problem statement:

How might we create a digital sport anyone (including athletes, non-athletes, disabled) could play between now and the next Olympics edition?

A is leader, B is time-keeper and C focuses on logistics

Deliverables:

- A PDF document with the ideation workshop script
- Pictures of the ongoing workshop
- A PDF document that represents the main concept out of the workshop
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".

- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Chapter IV

Exercise 01: UX IV - Ex 2 - Ideation

	Exercise 01
UX IV - Ex 2 - Ideation	
Turn-in directory : `ex01/`	
Files to turn in : `ex01/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Let's be creative!

Organize and run an ideation workshop with 4 - 8 participants to find ideas to solve this problem statement:

How might we provide relevant and on-demand information about the environmental and social impact of the Olympics through our platform?

B is leader, C is time-keeper and A focuses on logistics.

Pay attention not to use the same ideation technique as in Ex 1!

Deliverables:

- A PDF document with the ideation workshop script
- Pictures of the ongoing workshop
- A PDF document that represents the main concept out of the workshop
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with

too much details!

Chapter V

Exercise 02: UX IV - Ex 3 - Ideation

	Exercise 02
UX IV - Ex 3 - Ideation	
Turn-in directory : `ex02/`	
Files to turn in : `ex02/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Let's be creative!

Organize and run an ideation workshop with 4 - 8 participants to find ideas to solve this problem statement:

How might we help sports fans organize local Olympic Games in between 2 international editions?

C is leader, A is time-keeper and B focuses on logistics.

Pay attention not to use the same ideation technique as in ex 2!

Deliverables:

- A PDF document with the ideation workshop script
- Pictures of the ongoing workshop
- A PDF document that represents the main concept out of the workshop
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with

too much details!

Chapter VI

Exercise 03: UX IV - Ex 4 - User Flow

	Exercise 03
UX IV - Ex 4 - User Flow	
Turn-in directory : `ex03/`	
Files to turn in : `ex03/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Based on the main concept out of the workshop you led, design the user flow a user has to follow to access the main service.

This exercise is to be made individually.

Deliverables:

- A comprehensive user flow on a board (digital or pictures of a physical one)
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Chapter VII

Exercise 04: UX IV - Ex 5 - Prototyping

	Exercise 04
UX IV - Ex 5 - Prototyping	
Turn-in directory : `ex04/`	
Files to turn in : `ex04/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Give another dimension to your user flow and turn your user flow into a paper prototype (12 screens max).

First, draw low-fidelity prototypes on paper. One main screen = 1 mobile frame.

Then, draw your mid-fidelity screens on Figma with simple shapes, in black and white.

Tips: Vocabulary

- Low-Fidelity: Paper Prototypes - Example here https://miro.medium.com/max/1400/1*5nUfqqA2gjdAYHagjbHA5w.jpeg
- Mid-Fidelity: Wireframes - black and white, only the main elements, on digital prototype tools - Example here https://miro.medium.com/max/1400/1*eGSfaxwYbxUFomYbyO6GWw.png
- High-Fidelity: Wireframes with color, styles, graphical details, and micro-interactions - Example here https://miro.medium.com/max/1400/1*XnOHSKAvhr4TZzC9lN5udw.gif

Deliverables:

- Picture of a paper prototype

- A Figma file with the wireframes (mid-fi)
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

- Example: Paper Prototyping - The Practical Beginners guide https://www.uxpin.com/studio/blog/paper-prototyping-the-practical-beginners-guide/
- Example: Wellness App https://medium.com/@ebtaskin/story-of-my-very-first-ux-ui-design-project-at-ironhack-bootcamp-955addeb760e
- Android Mobile Template https://i.pinimg.com/originals/43/8e/de/438ede24264eb9552b635d34142eac29.png
- iPhone Template https://www.cssauthor.com/wp-content/uploads/2014/01/iPhone-5S-Template-PSD.jpg
- Figma

Quotes:

- 'If you're not embarrassed by the first version of your product, you've launched too late' Reid Hoffman | LinkedIn
- To prototype your solution, you'll need a temporary change of philosophy: from perfect to just enough, from long-term quality to temporary simulation.
- The prototype is meant to answer questions, so keep it focused. You just need a real-looking facade to which customers can react.

Chapter VIII

Exercise 05: UX IV - Ex 6 - Animation

	Exercise 05
UX IV - Ex 6 - Animation	
Turn-in directory : `ex05/`	
Files to turn in : `ex05/Figma file, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Animate your wireframes on Figma.
Think about multistate!!
This exercise is to be made individually.
Deliverable:

- An animated Mid-Fi prototype on Figma
- Upload the Figma file on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the file.
- Pay attention to the global aspect of the file. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Chapter IX

Exercise 06: UX IV - Ex 7 - Test

	Exercise 06
UX IV - Ex 7 - Test	
Turn-in directory : `ex06/`	
Files to turn in : `ex06/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Test your wireframe prototype with 5 different people and write down the 5 main iterations that need to be made on the next version.

This exercise is to be made individually.

Deliverables:

- A PDF document with the usability test script
- Pictures of the ongoing tests
- A PDF docuemnt with a report on what you learnt and a list of the 5 main iterations that you'd like to do on the next version
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!
