

Seamstress

Piscine UX/UI — UX

Piscine UX/UI https://github.com/01-edu/UX-UI

Summary: Strategy, empathy, definition, statement, ideas, prototype, test.

Prerequisites : The previous module of this piscine, or none if this is your first.

Version: 1.0

Contents

I Instructions 2
II Foreword 3
III Exercise 00: UX VII - Ex 1 - UX Strategy 4
IV Exercise 01: UX VII - Ex 2 - Empathy 6
V Exercise 02: UX VII - Ex 3 - Define 9
VI Exercise 03: UX VII - Ex 4 - Problem Statement 11
VII Exercise 04: UX VII - Ex 5 - Ideation 13
VIII Exercise 05: UX VII - Ex 6 - Prototype 14
IX Exercise 06: UX VII - Ex 7 - Test 16

Chapter I

Instructions

The foreword is not an exercise. It will not be graded. The exercises start at the next chapter, from the easiest contract to the hardest. A later exercise is not taken into account if an earlier one does not hold.

Only what is in the turn-in directory of an exercise is looked at. Do not add files that the exercise does not name. The name of a deliverable follows the pattern in the exercise: `Name_FirstName_DeliverableName_Date_VersionNumber`.

You will not be given the gesture. The examples in an exercise sometimes carry a constraint that the sentence does not repeat. Read them. Your other references are the manual of the tool you picked, the person sitting next to you, and the links printed in the exercise.

The order is the order of the quest. Skipping a step because a later screen looks more interesting produces a screen nobody can explain.

About the pictures

The mark on the cover is the project logo. The picture in the foreword is the illustration of this module. The pale ground behind the text is the page watermark. None of them is a hint.

About machines that write

You may use a tool to look up a term, the way you would use a dictionary. You may not replace an interview, a test, or a file with a generated text and sign it. If you cannot point at the person, the screen, or the line you claim, the exercise is not done.

Chapter II

Foreword

The Design Council published the double diamond as a map: two widenings, two narrowings (https://www.designcouncil.org.uk/our-resources/the-double-diamond/). Charles and Ray Eames liked to say that the details are not the details, they make the product. This quest walks the diamond. The map is not the garment.

Picture: Sonia Sevilla / CC0

Recommended watching. The videos are context. They are not the deliverable.

- UX - Introduction & Quest n°1, 01Edu https://www.youtube.com/watch?v=UbE6WMeuvQg&list=PLHyAJ_GrRtf-RAtfngbRrFh1XDTnyXFDe

Chapter III

Exercise 00: UX VII - Ex 1 - UX Strategy

	Exercise 00
UX VII - Ex 1 - UX Strategy	
Turn-in directory : `ex00/`	
Files to turn in : `ex00/Figma file and PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Context:

Elsa is a seamstress. She makes swimsuits on demand through her instagram account. It's going well, her community is growing as well as the amount of requests from customers.

However, she loses a lot of time every time there is a request. To complete an order, she needs to ask for the shape of the swimsuit, the size, the color preferences and the expected delivery time. On top of that, she needs to make sure she has enough time to sew one piece - every piece requires 6 hours.

For now, she only works with private messages but she wishes she could spend less time on that part.

You offer to help her design a solution to manage her time and workshop better. You have 4 working days.

Instructions:

Now you have discovered and practiced many tools in the design process, organize a time frame for the next 4 working days.

Select at least one tool for each phase, name it, and take into account the amount of time each phase may require.

- Empathy / User Research
- Define
- Problem Statement

- Ideation
- Prototype
- Test

Deliverables:

- A time frame, on PDF or on Figma, of the project, including the working days ahead, each phase of the process, the main tools you plan to use for each phase and the time you plan to spend for each tool.
- Upload the PDF or Figma document on Github, labeled as follows: "Name_ FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Resource:

- A sum up of all the tools that have been practiced https://www.figma.com/file/x0xfoz9TaEDiAfGPFqKJcs/RECAP-UX%2FUI-Program?node-id=0%3A1. Focus on the UX part!

Quotes:

- Design needs to fail. Failure is even a necessary step, but ideally it should happen before a product is launched, during the prototype and test phases
- "UX Strategy lies at the intersection of UX and business. It provides a much better chance of creating successful products. It enables teams to see the "Big Picture" to achieve the business goals under uncertain conditions" Jamie Levy | UX Strategy: How to Devise Innovative Digital Products That People Want
- UX Strategy is the method by which you validate that your solution solves a problem for real customers in a dynamic marketplace because the market is constantly changing.

Chapter IV

Exercise 01: UX VII - Ex 2 - Empathy

	Exercise 01
UX VII - Ex 2 - Empathy	
Turn-in directory : `ex01/`	
Files to turn in : `ex01/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Run at least one of the Empathy tools in the design process.
Deliverables:

- A PDF document with the script of the tool context
- Completed tool (scripts from user interviews, results from a quantitative analysis, etc.)
- A PDF document with the key learnings from this phase
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Use as many tools as needed, be make sure you do all the process in 4 working days!

Criteria:

- User interviews
  - The script is the interview guide. Make sure there is:
    - the main purpose of the interview
    - 1 to 3 hypotheses
    - a proper introduction that describes the interviewer and the purpose of this interview
    - 3 to 5 main topics
    - a few scan questions (demographics)
    - open-ended questions, max 10
    - a funnel process (>)
    - a conclusion with next steps and a thank you.
  - The completed tool is either:
    - 5 to 10 scripts from users
    - or an Affinity Diagram https://www.youtube.com/watch?v=VngWHIE4k9s with the main elements
- Analytics
  - The script is the form. Make sure there is:
    - The main purpose of the form
    - 1 to 3 hypotheses
    - A proper introduction that describes the interviewer and the purpose of this interview
    - 3 to 5 main topics
    - A few scan questions (demographics)
    - Closed-ended, unbiased questions, max 10
    - A funnel process (>)
    - A conclusion with next steps and a thank you.
    - A broadcast strategy
  - The completed tool is a series of quantitative data from at least 100 answers.
- Competitive analysis
  - The script is the strategy. The student explains what they are looking for and how they plan to find it.
  - The completed tool is a report. Make sure there is;

* There is an introduction
* There is a competitive landscape https://venngage-wordpress.s3.amazonaws.com/uploads/2019/03/g2crowd-grid.png
* With 2 relevant axes
* 10 organizations appear on the landscape
* There is a competitive table https://venngage-wordpress.s3.amazonaws.com/uploads/2019/03/product-features-comparison-matrix.png
* With 5 to 10 criteria
* 10 organizations appear on the table

Chapter V

Exercise 02: UX VII - Ex 3 - Define

	Exercise 02
UX VII - Ex 3 - Define	
Turn-in directory : `ex02/`	
Files to turn in : `ex02/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Run at least one of the Define tools in the design process.
Deliverables:

- A PDF document with the script of the tool context
- Completed tool (scripts from user interviews, results from a quantitative analysis, etc.)
- A PDF document with the key learnings from this phase
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Use as many tools as needed, be make sure you do all the process in 4 working days!

Criteria:

- Persona
  - The script is the list of insights the students uses to create the persona
  - The completed tool is a Persona board https://miro.medium.com/max/1400/0*RbHfR6BHhhFIENNf. Make sure the key insights come from the field, from reality, but the persona itself is different from only one user.
- Empathy Map
  - The script is the list of insights the student uses to create the Empathy map
  - The completed tool is an Empathy Map https://miro.medium.com/max/700/1*I1ffOWdPWQva3dCMQE-TAQ.png.
- User Journey
  - The script is the list of insights the student uses to create the User Journey.
  - The completed tool is a User Journey Map https://d2slcw3kip6qmk.cloudfront.net/marketing/blog/2017Q3/SEO-initiative-customer-journey-mapping/CustomerJourneyMap1.png.
- Jobs-to-be-done (JTBD)
  - The JTBD is tool that goes as a conclusion to another of the previous tools. Make sure:
    - The sentence is complete
    - The "When" part involves a visit on the website
    - The "I want to" part involves a practical action
    - The "So I can" part involves a psychological or emotional purpose

Chapter VI

Exercise 03: UX VII - Ex 4 - Problem Statement

	Exercise 03
UX VII - Ex 4 - Problem Statement	
Turn-in directory : `ex03/`	
Files to turn in : `ex03/PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:

Based on your research (Empathy & Define), define a problem statement to narrow the problem and KPIs to measure the success.

Deliverables:

- A PDF document with:
  - One problem statement
  - 1 to 3 KPIs
  - Key learnings from this phase
- Upload the PDF document on Github, labeled as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, it can be labeled as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within the document.
- Pay attention to the global aspect of the document. It must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- KPIs: check the SMART list https://www.grow.com/blog/how-to-use-smart-goals-to-build-your-kpis)

Quote:
Design is about solving problems. Fall in Love with the Problem, Not the Solution.
Examples of Problem statements:

- How might we help Pierre measure and prepare his hydration before a race?
  - Appropriate — > The problem statement is narrow enough to be specific for one painpoint, and broad enough to let creativity suggest many options. Also, it takes into accounts some of the key insights from the previous phases.
- How might we make sure Pierre doesn't get dehydrated?
  - Too broad — > The problem statement is out of the scope of running, so the solutions cannot be integrated in the specific context of running.
- How might we make sure Pierre drinks the cups that are offered during the race?
  - Too narrow — > There are plenty of options to avoid dehydration without drinking the cups that are offered during the race.
- How might we provide Pierre with a drink that contains everything he needs to avoid dehydration?
  - Focused on the solution, not the problem — > The problem statement is supposed to rephrase the brief and take into account the insights from the previous phase.
- How might make sure Pierre doesn't get drunk the night before the race?
  - Out of scope — > This is not about dehydration, nor about running.

Chapter VII

Exercise 04: UX VII - Ex 5 - Ideation

	Exercise 04
UX VII - Ex 5 - Ideation	
Turn-in directory : `ex04/`	
Files to turn in : `ex04/Figma file and PDF, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Run at least one of the Ideation techniques in the design process.
Deliverables:

- A PDF document with the script of the tool context
- Completed tool: a board with all the ideas - on paper or digitally on Miro or Figma
- A PDF document with the key learnings from this phase
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Use as many tools as needed, and make sure you do all the process in 4 working days!

Chapter VIII

Exercise 05: UX VII - Ex 6 - Prototype

	Exercise 05
UX VII - Ex 6 - Prototype	
Turn-in directory : `ex05/`	
Files to turn in : `ex05/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Make a prototype including the chosen solution.
Deliverables:

- Pictures of a paper prototype (low-fi)
- An animated wireframe prototype (mid-fi)
- Key learnings from this phase
- Vocabulary
  - Low-Fidelity: Paper Prototypes - Example here https://miro.medium.com/max/1400/1*5nUfqqA2gjdAYHagjbHA5w.jpeg
  - Mid-Fidelity: Wireframes - black and white, only the main elements, on digital prototype tools - Example here https://miro.medium.com/max/1400/1*eGSfaxwYbxUFomYbyO6GWw.png
  - High-Fidelity: Wireframes with color, styles, graphical details, and micro-interactions - Example here https://miro.medium.com/max/1400/1*XnOHSKAvhr4TZzC9lN5udw.gif

- Upload the documents on Github, in a zip folder named "ProjectTitle_ Name_FirstName", with all project deliverables as follows: "Name_FirstName_ DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!

Tips:

- Use as many tools as needed, and make sure you do all the process in 4 working days!
- You may use Card Sorting and User flows

Criteria:

Criteria

- User Flow

Make sure for each flow:

- The user has a specific goal
- There is a starting point and and ending point - which is the goal of the user
- There is a series of actions organised in rectangles (actions) or diamond (choice)
- The actions are linked with arrows
- Card sorting

Make sure

- There is a script including the research goals.
- The research goals must be close to "rearrange the content"
- There are pictures of the ongoing workshop
- There is a new content organization shown in a table with sticky notes (it can be a picture or digital)

Chapter IX

Exercise 06: UX VII - Ex 7 - Test

	Exercise 06
UX VII - Ex 7 - Test	
Turn-in directory : `ex06/`	
Files to turn in : `ex06/zip archive, named Name_FirstName_DeliverableName_Date_VersionNumber`	
Allowed functions : `Those named in the exercise`	

Instructions:
Prepare a testing protocol and run it!
Deliverables:

- A testing protocol script
- Photos from the tests
- Key learnings from the tests (5 tests are required)
- Key learnings from this phase
- Upload the documents on Github, in a zip folder named "ProjectTitle_Name_FirstName", with all project deliverables as follows: "Name_FirstName_DeliverableName_Date_VersionNumber". For example, the first deliverable can be named as "Doe_John_MidFiPrototype_05242024_V1".
- Add a title within all written documents.
- Pay attention to the global aspect of the deliverables. They must be clear, simple and easy to read. You can get inspiration on canva.com but don't overload your design with too much details!
